

SmartFoil

Overview

SmartFoil is an ultra-thin electric radiant floor heating system primarily for use under laminate, engineered wood and glued hardwood. Uniform heating is achieved by the specialised materials used, which also eliminates problems due to hotspots or localised heating. As the SmartFoil is fully earth protected and covered in aluminium foil, the mat can be installed in wet areas, including bathrooms and kitchens.

The SmartMat lifetime warranty ensures your heating mat gives you a lifetime of trouble-free use and is guaranteed against manufacturer defects for the lifetime of the initial floor covering.

The SmartGuard installer warranty guarantees if you damage your SmartMat product before your finished floor surface is installed, we will replace your SmartMat product with an equivalent product free of charge.

Specification

Cable thickness	3mm
Output	140W/m ²
Operating Voltage	230/240V
Cold tail connection lead	3m
Standards	Semko S Mark Approved

Features

- Full earth protection
- Ultra-thin heating cable
- Twin conductor heating cable
- Complete earth braiding
- Easy to install
